Affiliation

- 2021.08 – 2022.01 📖 **HexHive group, École Polytechnique Fédérale de Lausanne, Switzerland**
Visiting doctoral student
- 2019.05 – now 📖 **Institute of Cyberspace Research (ICSR), Zhejiang University, China**
Ph.D. student
Research topics: Security analysis on low-level software and systems (embedded firmware, the Linux kernel, hypervisors like QEMU, etc.).
- 2017.07 – 2019.04 📖 **Internet and Security Technology (LIST) lab, Zhejiang University, China**
Research intern and Ph.D. student
Research topics: Mobile authentication [1, 2] and ransomware detection.
- 2016.09 – 2017.06 📖 **Information System Security and Countermeasures Experiments Center, Beijing Institute of Technology, China**
Research intern
Research topics: Network protocol fuzzing with Peach.

Education

- 2018.09 – now 📖 **Ph.D. Student, Computer Science**
College of Computer Science, Zhejiang University, China
Advisor: Yajin Zhou (Zhejiang University)
- 2014.09 – 2018.06 📖 **Bachelor, Electrical Engineering**
School of Electrical Engineering, Beijing Institute of Technology, China
Thesis title: *Applying LSTM to the implicit continuous authentication of smart phones.*
Thesis statement: *Through implicit continuous authentication system based on the smart phone motion sensor, it is possible to solve the problems of ease of use and security in user authentication. With the LSTM model and parameters tuning, the final FAR reached 6.352% and the FRR reached 6.232%. This result shows that the implicit continuous authentication has considerable accuracy, providing support for the introduction of implicit continuous authentication into existing smartphones.*
Advisor: Yan Chen (Northwestern University)
Co-advisors: Limin Pan and Senlin Luo (Beijing Institute of Technology)
Tutor: Tiantian Zhu (Zhejiang University of Technology)

Service

- 2020.09 – 2021.06  **Mentor, Undergraduate Final Project, Zhejiang University**
Instructor: Yajin Zhou
Project 1: Rehosting Linux Kernels for Cyber Physical Systems based on QEMU
Project 2: The Design and Implementation of Linux GPU Kernel Driver Vulnerability Detection System based on Userspace Fuzzing
I joined the discussion, gave feedback, came up with technical solutions, reviewed their papers and controlled the overall time budget of the two projects.
- 2019.09 – 2020.01  **Teacher Assistant, Operating System, Zhejiang University**
Instructor: Yajin Zhou
I joined the discussion and then wrote the first version of instructions to build an operation system for AArch64 and RISC-V from scratch.
- 2019.03 – 2019.06  **Teacher Assistant, Information Security Labs, Zhejiang University**
Instructor: Yajin Zhou

Talk

- 2021.06  **Poster, AsiaCCS 2021, Hong Kong, China**
FirmGuide: Boosting the Capability of Rehosting Embedded Linux Kernels through Model-Guided Kernel Execution
- 2019.11  **Presenter, CCS19@IoT-S&P'19, London, UK**
EAPA: Efficient Attestation Resilient to Physical Attacks for IoT Devices Environment

Technical Focus

- Coding  Python, C/C++, Java, \LaTeX , Docker, Bash, Vim
- Security  Fuzzing, Symbolic execution, Static analysis on LLVM pass
- Languages  English/Chinese speaking and writing
- CTF  Reverse engineering, PWN, Firmware analysis
