QIANG LIU

PostDoc@EPFL | BC 154, Station 14, 1015 Lausanne, Switzerland
cyruscyliu@gmail.com | https://cyruscyliu.github.io | Revision: November, 2025

HIGHLIGHTS

- Dedicated to system security that seeks to establish chain of trust spanning the entire technology stack, from low-level software to user applications, and from individual computers to large-scale distributed and heterogeneous systems, by 1) building dynamic analysis platforms to examine the chain of trust through full-chain exploits; and, 2) on top of these platforms, developing both pre-release vulnerability identification and post-release attack mitigation techniques, grounded in a deep understanding of hardware and software
- Built dynamic analysis platforms for low-level systems, e.g., kernels and hypervisors [13, 12, 8, 4, 1]
- Modeled devices with symbolic execution, program analysis, and taint analysis [13, 12, 10, 3, 1]
- Published papers at all four top-tier security conferences and have won two best paper awards
- Co-advised PhD, MSc, and BSc students as a PostDoc
- Served on the technical program committees of IEEE/ACM ASE'25, and USENIX Security'25; reviewed for IEEE TIFS, ACM CSUR, and ACM TOSEM

Yajin Zhou, Assistant Professor, Zhejiang University, yajin@vm-kernel.org
Mathias Payer, Associate Professor, EPFL, mathias.payer@nebelwelt.net
Manuel Egele, Associate Professor, Boston University, megele@bu.edu

EDUCATION

PhD, Cybersecurity, Zhejiang University, China 09/2018 - 09/2023
Advisors: Prof. Yajin Zhou and Prof. Mathias Payer (External co-advisor @EPFL)
Research Topics: Firmware Rehosting [13, 12], Hypervisor Security [10]
Thesis: Research on Key Technologies of Virtualization for Linux-based Peripherals

Bachelor, Electrical Engineering, Beijing Institute of Technology, China 09/2014 - 06/2018
GPA: 88.2, Rank: 2/30
Advisors: Prof. Limin Pan and Prof. Tiantian Zhu (External co-advisor @ZJU)
Research Topics: Mobile Authentication [11, 14, 15]
Thesis: Applying LSTM to the Implicit Continuous Authentication of Smart Phones

WORKING EXPERIENCE

PostDoc, HexHive, EPFL, Switzerland 11/2023 - Present
Advisor: Prof. Mathias Payer
Research Summary: 1) Building dynamic analysis platforms for low-level systems with high-fidelity device modeling [8, 3, 4, 1], 2) Hardening network protocols to build up chain of trust across devices [9], 3) Application security in web browsers [7] and programming languages, 4) Building agentic workflows for security and checking the security of agentic AI

🏆 HyperPill [8] won the best paper award at USENIX Security'24
🏆 Tango [9] won the best paper award at ACM RAID'24
🏆 Magma [2] won the Cybersecurity Artifacts Competition and Impact Award at ACSAC'25

TEACHING/ADVISING EXPERIENCE

Co-advisor, Browser Security
Han Zheng @EPFL, PhD research projects, Browser testing [7] 08/2024 - 08/2025
Yishun Zeng @THU/EPFL, PhD research project, Browser workload synthesis 01/2023 - 12/2023

Co-advisor, Programming Language Security
Yiwen Xu @EPFL, PhD research project, Rust 10/2025 - Present
Chibin Zhang @EPFL, PhD research projects, interpreter fuzzing [5, 6] 08/2024 - Present

Co-advisor, Network Protocol Security
Xuesong Bai @UCI, PhD research project, BGP fuzzing 10/2025 - Present
Philippe Dourassov @EPFL, BSc final project, BGP fuzzing 09/2024 - 01/2025
Thaqiya Aman @PUB/EPFL, BSc summer internship, fuzzing benchmarks 06/2024 - 08/2024

Co-advisor, Magma: A Ground-Truth Fuzzing Benchmark [2]
Nadine Alfadelraad, MSc semester project, agentic PoC generation 10/2025 - Present
Sara Vaccino @EPFL, BSc summer internship, PoC generation 07/2025 - 08/2025
Srividya Subramanian @ETHZ/EPFL, MSc semester project, fuzzing benchmarks 02/2025 - 06/2025

Co-advisor, Hypervisor Security
Sofia Saltovskaia @EPFL, PhD research projects, pKVM 10/2025 - Present
Sydney Hauke @EPFL, MSc thesis, ARM64 hypervisor fuzzing 09/2024 - 01/2025
Christoph Wech @ETHZ/EPFL, MSc semester project, hypervisor race conditions 09/2024 - 01/2025
Zheyu Ma @THU/EPFL, PhD research project, virtual device models [3] 01/2024 - 12/2024

Co-advisor, Kernel Security
Yangxi Xiang @ZJU, PhD research project, post kernel fuzzing 10/2025 - Present
Zezhong Ren @UCAS, PhD research project, post kernel fuzzing 10/2025 - Present
Kaiyuan Liu @ZJU, BSc final project, embedded firmware rehosting 09/2020 - 06/2021
Yangxi Xiang @BUPT/ZJU, BSc final project, kernel driver fuzzing [4] 09/2020 - 06/2021

Teaching Assistant, Operating System, ZJU
I joined the discussion and subsequently drafted the initial version of the instructions for building an operating system from scratch for AArch64 and RISC-V. Additionally, I answered questions during office hours and graded assignments. 09/2019 - 01/2020

Teaching Assistant, Information Security Labs, ZJU
I graded assignments. 03/2019 - 06/2019

SERVICE EXPERIENCE

PC Members: FUZZING'26, USENIX Security 25, IEEE/ACM ASE'25, FUZZING'24, ASE'22 AE
Reviewer: IEEE TIFS, ACM CSUR, ACM TOSOM
Sub-reviewer: NDSS'24, AsiaCCS'22, AsiaCCS'20, CODASPY'20, CODASPY'19
Session Chair: AsiaCCS'25

PRESENTATIONS EXPERIENCE

Towards Full-Lifecycle Security Enforcement of Hypervisors
Invited Talk, UNSW, Sydney, Australia 07/2025
Invited Talk, ANU, Canberra, Australia 07/2025
Invited Talk, University of Melbourne, Melbourne, Australia 07/2025
Invited Guest Lecture, EPFL, Lausanne, Switzerland 05/2025

Towards Full-Lifecycle Security Enforcement of Systems
Invited Job Talk, NUS, Singapore, Singapore 03/2025

Invited Job Talk, ShanghaiTech, Shanghai, China 03/2025

Tango: Extracting Higher-Order Feedback through State Inference
Efficiently Rebuilding Coverage in Hardware-Assisted Greybox Fuzzing
Replay-resistant Disk Fingerprinting via Unintentional Electromagnetic Emanations
Main Conference, ACM RAID'24, Padua, Italy 10/2024

ViDeZZo: Dependency-Aware Virtual Device Fuzzing
Invited Talk, Georgia Tech, Online 09/2023
Main Conference and Poster Session, IEEE S&P'23, San Francisco, USA 05/2023

FirmGuide: Boosting the Capability of Rehosting Embedded Linux Kernels through Model-Guided Kernel Execution
Main Conference, ASE'21, Online 11/2021
Poster Session, AsiaCCS'21, Online 06/2021

EAPA: Efficient Attestation Resilient to Physical Attacks for IoT Devices Environment
Workshop, ACM CCS19@IoT-S&P, London, UK 11/2019

PUBLICATIONS

Contributions of First-Authored* and Corresponding-Authored§ Papers

Because my research focuses on low-level system security, each project requires a long development cycle to move from idea to a publishable prototype at a top-tier venue. Typically, it takes around two years to fully realize a research idea, implement and evaluate it, and go through the peer-review process. Since 2019, I have consistently led major projects at this pace: FirmGuide [13] (2019 – 2021), ViDeZZo [10] (2021 – 2023), Tango [9] (2023 – 2024), and MalHype [1] (2024 – present).

Contributions as a Co-advisor

As a PostDoc, I play a senior role in guiding collaborations, typically contributing to two projects per year through idea refinement, component implementation, manuscript, rebuttal, and presentation revisions. Since 2023, I have consistently co-advised the following projects at this pace: HyperPill [8] (2023 - 2024), Truman [3] and Reflecta [5] (2024 - 2025), CrossFit [6] and Grape [7] (2024 - Present).
